Describe the strongest aspect of this course:

- It was offered online.
- Working on my research paper really helped me to understand the area in great detail.
- Dr. Allen is so good at giving feedback in a timely manner, she is professional and has a true passion for her work. Also, her work is challenging, but engaging. Overall great job!
- Completing paper in sections

Describe the weakest aspect of this course:

- Not enough time spent in discussion with class/instructor. It felt as though we were scrambling for questions and answers. I'm not sure this can be addressed given the nature of the course.
- This semester we did not really chat that much online bc our paper was so time consuming.
- n/a

How do you think this course could be improved?

- There were days when class was scheduled to start at a given time and about 1-2 hours before it was to start the start time of class was pushed back. I would have liked a little more notice.
- More time to discuss papers with peers

Any additional comments?

- I'm quite sure after taking this class that I do not want to write a dissertation.
- n/a
